ECOADDENDUM

native plant educators,
ECOADDENDUM is a
non-profit,
501 c3 organization
743-B3 E College Ave.
Decatur, GA 30030

. . .benefitting the Birds,
Butterflies and Bees

MISSION STATEMENT:

EcoAddendum's mission is to heal our environment by reintroducing native plants into Georgia's landscape through environmental education, greenspace installation, and native plant sales. By propagation of local ecotypes and sales of native plants, we create sustainable greenscapes adapted to Georgia's ecosystems. Our Birds Butterflies and Bees program cultivates environmental stewardship by creating programming and native plant gardens for individuals, schools, and community spaces throughout metro Atlanta.

FALL PLANT SALES BEGIN
September 12th

FALL PLANT SALES END
November 11th - ALL orders turned in.

Arrange your plant pick-up by phone or email,
or take advantage of our Open House plant pick-up days.

THANK YOU FOR
YOUR SUPPORT!

BBB MISSION

The Birds Butterflies & Bees program promotes ecological recovery and environmental stewardship through engaging educational activities and the creation of student designed and installed native plant gardens.

Our programs cultivate an understanding of our local Georgia ecology and promote a direct involvement with the ecosystem in your schoolyard. Lesson and activity topics include:

- Native Plants
- Pollinators
- Plant Biology
- Food Web
- Birds & Wildlife
- Environmental Balance

Whether you are looking for an hour-long program, a half-day planting or a six-month garden project, we have something for everyone at every age level.

20% of every plant sold during your school's plant sale goes into your school's BBB Fund Account which can be used for any of the programs we offer, or applied to any of the native plants offered in our nursery. The money is kept in this account until needed by your school for its BBB programming or BBB native plant garden project.

BBB GREENSPACE PROJECTS:

Freedom Park
Candler Park
Hurt Park
Outdoor Activity Center
Hammonds House Museum
Chimney Park

BBB SCHOOL PROJECTS:

Decatur High School
DeKalb Early College Academy
Paideia School
Sope Creek Elementary

SUGGESTIONS:

Buy a native plant for the school or greenspace of your choice. The plant will go directly to that project.

Buy a native plant for your own garden. 20% of your purchase will go directly to the school or greenspace of your choice. For instance, a \$25 plant raises \$5.

PLANT SALE PAYMENT OPTIONS:

- Send a check made out to EcoAddendum with the order form and mail to 743-B3 East College Ave., Decatur, GA 30030.
- Pay student at time of plant order.
- Pay at plant sale pick up date.

Plant Buying Made Easy:

We've packaged together plants that will bloom June-November for typical Georgia conditions. Receive 5 different plants per combo. Each package includes 5 plants tailored to a specific environment/habitat. All plants have been selected to support Birds, Butterflies, and Bees (of course!).

SHADE COMBO

\$47 for 5 plants

These Plants Will: Enjoy shade conditions

Blooms: JUNE- NOVEMBER

Set off visual fireworks in your shade garden with this selection of plants! They support hummingbirds, hummingbird moths and cloudless sulphur butterflies, as well as providing much needed sweeps of color in the shade.

Asarum arifolium, Wild Ginger

Lobelia pubera, Downey Blue Lobelia

Eurybia divaricata, White Woods Aster

Lobelia cardinalis, Cardinal Flower

Symphotrichum cordifolium, Heart Leaf Aster

SUN COMBO

\$47 for 5 Plants

These Plants Will: Survive drought conditions

Blooms: APRIL - NOVEMBER.

Support gold-finches and other seed-eating birds!

Supply nectar for: Buckeye, Sulphurs, Checkerspots, Skippers, Metalmark, and American Painted Lady Butterflies among others (www.bamona.org). These long-blooming hardy plants will provide cut flowers, and dried arrangements, or winter-interest seed plumes for your garden.

Eragrostis spectabilis, Purple Love Grass

Penstemon digitalis, Foxglove Penstemon

Coreopsis grandiflora, Large Flowered Coreopsis

Liatris microcephala, Small Head Blazingstar

Symphotrichum georgianum, Georgia Aster

courtesy Lady Bird Johnson
Wildflower center

POLLINATOR COMBO

\$42 for 5 Plants

These Plants Will: Increase your garden productivity by tempting your pollinators to stick around for the native flowers they love! Long blooming plants provide cut flowers, striking foliage, as well as seeds for birds, cover and nesting sites. Also provide nectar or caterpillar support to: Hairstreaks, Swallow-tails, Painted Lady, Metalmark, and Checkerspot Butterflies.

Agastache scrophulariifolia, Purple Hyssop

Eupatorium album, White Thoroughwort

Pycnanthemum tenuifolium, Narrowleaf Mountain Mint

Helianthus divaricata, Rough Sunflower

Solidago rugosa, Rough Leaf Goldenrod

Bransford, W.D. Mrs., Ladybird
Johnson Wildflower Center

URBAN FARMER COMBO

\$47 for 5 Plants

These Plants Will: Provide heavy pollinator forage from early summer through late fall. Each species has multiple stems with multiple bloom heads. Please note, these are tall plants, they do a lot of work providing food to pollinators! Winter interest seed heads, seeds and berries for birds, cover and nesting sites. Also provides nectar to Mason Bees, Bumblebees, Swallowtails, Hummingbird Clearwings, Skippers, Checkerspots, American Painted Lady Butterflies.

Agastache scrophulariifolia, Purple Hyssop

Helianthus divaricata, Rough Sunflower

Pycnanthemum incanum, Mountain Mint

Sambucus canadensis, Elderberry

Vernonia noveborascensis, Ironweed

Bransford, W.D. Mrs., Ladybird Johnson Wildflower Center

BIRD COMBO

\$59 for 5 plants

These Plants Will: Enjoy both sun and shade conditions, Bloom: MAY - NOVEMBER. Provide fall color, summer berries, fall berries, winter interest seed heads, seeds, cover, and nesting sites for birds. They supply nectar for or host plants for Bumblebees, Skippers, Checkerspots, Hummingbird Clearwings, Spicebush Swallowtail, and Promethea Moths. These plants provide cut flowers and dried arrangements, are long-blooming, and have semi-evergreen foliage.

Chasmanthium lattifolium, River Oats

Echinacea purpurea, Purple Coneflower

Lindera benzoin, Spicebush

Sambucus canadensis, Elderberry

Viburnum acerifolium, Maple Leaf Viburnum

Vick, Alfred F.W., Ladybird Johnson Wildflower Center

HOW TO REGISTER

Register by mail:

Complete the registration form below and send with payment to reserve your spot.

Send to: EcoAddendum,
743-B3 East College Ave,
Decatur, GA 30030

Register by phone or online:

Fill out the online registration form at www.ecoaddendum.org,
or register by phone (678) 732-9430.

FALL CLASSES IN THE GARDEN with EcoAddendum

Join us for a blended offering of art, gardening and science classes at **ECOADDENDUM'S CLASSROOM:**
743-B3 East College Ave., Decatur, GA 30030.

ADULT PROGRAMS

Fall, 2011

FALL Classes and Free Talks in the Garden with EcoAddendum

9/17/11

SEED COLLECTION AND CLEANING with Jim Rogers

10am-12pm at EcoAddendum

Instructor: Jim Rogers

Join Nearly Native Nursery's Jim Rogers, as he explains the basics of seed collection. Topics include seed collection times, proper seed collection techniques as well as cleaning, treatment, and storage of seed. Jim will also cover several different seed propagating techniques.

Fee: \$30, \$25 for members

9/22/11

AUTUMN PLANT SALE OPEN HOUSE at EcoAddendum

All Day Event

Open House 9am – 7:30pm. Wine and Art 5pm – 7:30pm

Free Talk: "Biodiversity and Your Backyard Ecosystem" 6:45pm at Ecoaddendum. Discussion of biodiversity in the backyard ecosystem with EcoAddendum staff.

10/13/11

**AN EVENING AT ECOADDENDUM:
PLANT SALE OPEN HOUSE AT ECOADDENDUM**

All Day Event

Open House 9am – 7:30pm.

Wine and Art Reception 5pm – 7:30pm

Free Talk: "Fall Planting: Mother Nature's Layaway Plan" 6:45pm at EcoAddendum. Guest Speaker, Mt. Arabia Ranger Robby Astrove.

10/15/11 & 10/22/11

WATER FOR WILDLIFE:

MAKE A MOSAIC BIRDBATH Part 1&2

10am-12pm at EcoAddendum

Instructor: Stephanie Coffin

Not everyone has room for a large expensive water feature like pond or a bog. A shallow bird bath is an inexpensive and easily installed water feature that provides an important habitat resource for birds, bees, and other small wildlife. This class will get you started with the basics that will give you the confidence to take on other projects. Reference books and a variety of materials will be at the class for those who want to experiment and learn more. Mosaics are so popular now because they are easy, inexpensive and anyone can do it. Color, design and permanence are the best characteristics of this popular art form.

Stephanie has been creating mosaic installation in the Atlanta area for 10 years, and has created mosaics from house-sized mural installations to small birdbaths and interior surfaces.

Fee: \$60, \$50 for members plus Material Fee \$15

This is a popular class sign up early space is limited!

11/3/11

**AN EVENING AT ECOADDENDUM:
PLANT SALE OPEN HOUSE AT ECOADDENDUM**

All Day Event

OpenHouse 9am – 7:30pm.

Free Talk: “Pruning in the Fall for Healthy Spring Growth.”

6:45pm at EcoAddendum. Guest Speaker, Barbara Dorfman.

11/12/11

**FALL ART WITH LOCAL ARTIST SARAH COLLMAN
“NATURALLY” GIFTED**

10am at EcoAddendum

Naturally gifted; Create naturally inspired illuminations great for gift giving. All ages welcome

Using nature as our inspiration, we will create unique mixed media collages that come to life when illuminated with a small light source. Your gift recipient could use this as a nightlight or as illuminated artwork to brighten up a drab corner. We will complete this project by creating a unique gift box to make your naturally inspired illumination ready to give.

Instructor Sarah Collman

Fee: \$30, \$25 for members plus Material Fee \$10.

12/3/11

DESIGNING GARDENS FOR WILDLIFE

10am-12pm at EcoAddendum

Want to have a healthy backyard ecosystem that provides habitat and food for birds and beneficial insects such as bees and butterflies? Join Landscape Architect Andrea Greco as she leads a hands on class in wildlife garden design. This class will cover basic concepts of garden design while you learn how to utilize native plants that play a critical role in the life cycles of our indigenous wildlife.

Bring a general layout of your yard to class highlighting locations of boundaries, existing plants, existing trees and locations of tree canopies, and walkway locations. During this class, you will learn about how to utilize native plants that play a critical role in the life cycles of our indigenous wildlife. We will discuss how to assess your current garden habitat and add features that will be both visually appealing and ecologically functional. We will also look at low impact methods of managing your landscape that will sustain the habitat you have created. By following a few basic guidelines we will cover in this class, you will be able to make your yard come to life.

Instructor Andrea Greco

Fee: \$30, \$25 for members

Purchase a plant for personal use (please check appropriate box) and 20% of the sale goes to the listed Native Plant Project of your choice!

OR

Purchase a plant for the listed Native Plant Project of your choice, and the plant goes to that project!

PLANT PICK-UP

Plants may be picked up at an ECOADDENDUM OPEN HOUSE:
September 22, October 13, November 3
OR, plants may be picked up on a school pick-up date.

OR Paypal / Credit card:
Please pay online at www.ecoaddendum.org

ECOADDENDUM MEMBERSHIP 2011

BASIC MEMBERSHIP BENEFITS:

“The Addendum” quarterly newsletter, Wildlife gardening articles and tips, local environmental projects, what’s growing in the nursery now, plant sale specials!

Volunteer opportunities! Learn about wildlife/pollinator gardening, connect with other wildlife/native plant gardeners, while beautifying our communities.

ALL donations go towards native plant installation and environmental remediation in public spaces, environmental education, and the cultivation of environmental stewardship.

STUDENT (student ID required) Donation of \$10

Includes basic member benefits

Senior (over 55)

Donation of \$15

Includes all basic member benefits listed above.

Plus \$2 off purchase of an EcoAddendum T-shirt.

INDIVIDUAL Donation of \$25

Includes ALL basic member benefits.

Plus 5 % off of a group presentation given by an EcoAddendum Horticulturist.

Choose to have 10 % off native plant purchases and 10% to a school project OR 20% of plant sale to a school project.

15 % off individual educational classes

\$5 off a purchase of an EcoAddendum

T-shirt

ECOADDENDUM MEMBERSHIP 2011

ADDENDER Donation of \$40

Includes ALL Individual level benefits.

Plus: 20 % off of Educational Classes

Free 2011 EcoAddendum T-shirt

Five hand-harvested native seed packets

CONTRIBUTOR \$100

Includes ALL Addender level benefits.

Plus recognition in the “Addendum” Quarterly.

SUPPORTER \$250

Includes ALL Contributor level benefits. Plus recognition in the “Addendum” Quarterly and website donor page, if desired.

Selection of 1 free 3 gallon shrub or tree.

PATRON \$500

Includes ALL Supporter level benefits.

Plus Free Educational Class of your choice.

BENEFACTOR \$1000+

Includes ALL Patron level benefits

Plus free garden/landscape consultation.

Perennials, Shade

courtesy Lady Bird Johnson
Wildflower center

\$10.00 1 gal.

***Asarum arifolium* Wild Ginger**

Perennial Herb. Shade or morning sun, thrives with good moisture but tolerates drought. Creeping, low non-erect stems with large heart shaped leaves, 6-10." Blooms: 1/2" long dark speckled maroon, tubular flower with no petals, only sepals, flower occurs at base of plant on or in leaf litter. Color and shape of bloom is highly variable, blooms April-May. Leathery 6 chambered capsule with numerous seeds. Native Americans used Wild Ginger to treat a variety of ailments, also used to season meat and fish.

\$10.00 1 gal.

***Carex platyphylla* Blue Satin Sedge**

Low, grass-like perennial, evergreen. Full sun to part shade. Moist, well drained to dry soil. Spreading clump of grass-like leaves. 12" Terminal dense spikes without petals or sepals bloom Apr. - Jul. Ellipsoid nutlet forms Jul - Dec. Sedges are an important food source for ground feeding game birds and various songbirds, especially sparrows. They are also important nesting and escape cover for fledglings.

\$10.00 1 gal.

***Chasmanthium lattifolium* River Oats**

Perennial, tuft-forming grass. Full sun to shade, moist to average soil. Tall grass, forms clumps from rhizomes, 2-4.' Flowers from Jun-Oct., seeds are grains, flat-ovoid, Nov-Feb. Drooping spiky seed clusters, good in dried arrangements. Many songbirds consume seeds through the winter. Leaves can persist green into winter

\$10.00 1 gal.

***Eurybia divericata* White Woods Aster**

Perennial herb. Part shade to shade, in well drained, average soil. Drought tolerant. Low spreading multiple stems are 1-2' tall, topped with clusters of multiple purplish-white flowers bloom Aug. - Nov. Provides seeds for wintering birds. Seed source for songbirds, provides nesting material for birds.

\$10.00 1 gal.

***Lobelia cardinalis* Cardinal Flower**

Perennial herb. Morning sun only to part shade, well-drained moist to wet soil. Basal leaf rosette at the base of a tall, erect, unbranched stem, topped with scarlet flowers, 2-5' tall, usually around 3' tall. Brilliant red 1-3" terminal flowers bloom 4 weeks in July-October. Ruby Throated Hummingbirds, Cloudless Sulphur Butterfly, Hummingbird Clearwing Moth feed on the nectar.

\$10.00 1 gal.

***Lobelia puberula* Downy Blue Lobelia**

Perennial herb. Full sun to part shade in moist to average soil. Basal leaf rosette with an erect stalk covered in multiple small blue flowers, 2-3' tall, blooms July- Oct. Ruby Throated Hummingbirds, Cloudless Sulphur Butterfly, Hummingbird Clearwing Moth feed on the nectar.

\$10.00 1 gal.

***Symphyotrichum cordifolium* Blue Woods Aster**

Perennial herb. Part shade, moist to dry well drained soil. Multiple branches 2-4' tall from a common root crown topped with clusters of blue-white to purplish ray flowers with yellow centers, blooms Jun- Aug. Larval host for Confused Eusarca, nectar source for bees and multiple butterfly species.

Vick, Alfred F.W., Ladybird Johnson Wildflower Center

\$10.00 1 gal.
***Vernoniastrum virginicum* Culver's Root**
Perennial herb. Full sun to part shade, well drained moist to average soil. Upright, unbranched stem with whorled dark green leaves that puts forth a spike of flowers at the top, 3-5' tall with numerous small white flowers resembling a bottlebrush. Blooms for 4 weeks during Jun-Aug. Dark brown very tiny seeds in a dark brown capsule, Sept-Oct.

\$10.00 1 gal.
***Echinacea purpurea* Purple Coneflower**
Perennial herb. Full sun, dry to slightly moist, ensure drainage in moist sites. Drought tolerant basal leaves with tall sparsely leaved blooming stems, 2.5-3.5' tall. Large pink to purple blooms occur from Jun-Aug. Wide variety of butterflies and bees gather nectar and pollen from the flowers. Tan nutlets (achenes) form in Aug-Sept, are enjoyed by various finches and other songbirds. An important native herb, all parts of the plant stimulate the immune system.

Perennials, Sun

\$10.00 1 gal.
***Agastache scrophularifolia* Purple Hyssop**
Perennial Herb. Full sun to part shade, well drained moist to average soil. Erect stem with opposite leaves topped by a spike of multiple flowers 3-6', multiple purplish-red flowers on a terminal spike, blooms from June-Sept. Bloom spikes are good as a cut flower, seed heads can be used as dried ornamental. Excellent pollinator support, attracts many species of bees, bumblebees, mason bees, numerous butterflies, including Tiger Swallowtail, Hummingbird Clearwing, plentiful flowers all summer long and into the Fall. Seeds are enjoyed by goldfinches, other songbirds.

\$10.00 1 gal.
***Eragrostis spectabilis* Purple Lovegrass**
Perennial Grass. Full sun to part shade, dry to average well drained soil; drought tolerant. Clumping, erect grass topped with wispy tiny flowers in purple plumes during fall, 1-2.5' tall; 2-3' wide blooms Jul.- Aug, plumes are up through the winter. Provides seed forage to songbirds, cover for songbirds and fledglings. Provides host plant for Skipper Butterflies.

\$10.00 1 gal.
***Coreopsis grandiflora* Large flowered Coreopsis**
Perennial herb. Sun to part shade, average well drained soil, drought tolerant. Erect stem with opposite narrow leaves topped with bright golden flowers. Will form colonies through branching stems at the base, 2-3' tall with 2" yellow ray flowers with yellow centers. Flowers support multiple pollinators: Checker, Skipper and other mid-sized butterflies as well as many native bees such as mason bees, bumble bees, Jun- Sept. Brown nutlets in Jul - Nov provide forage for songbirds.

\$10.00 1 gal.
***Eryngium yuccafolium* Rattlesnake Master**
Perennial herb. Full sun to partial shade, dry to average, or moist with excellent drainage. Blue green, basal spiky leaves with striking, tall erect flower stalk, Greenish-white spiked globes, 2-4' tall. blooms for 4 weeks, Jun-Aug. Scaly globular fruits, Sept.-Oct. Excellent in dried arrangements. "Epitome of a 'no-care' plant." - Jan Midgley. Bees and moths visit the flowers. Native Americans used preparations of the fibrous taproot to treat a variety of ailments.

\$10.00 1 gal.
***Eupatoriadelphus fistulosum* Joe Pye Weed**
 Perennial herb. Sun to partial shade, wet to average soil. Multiple tall, thick, hollow stems originating from large feeder roots, 6-10'tall. Very large, fluffy globular clusters of tiny pink disc flowers top each stem, July-Oct. Nutlet (achene) topped with tan bristles., Sept. - Oct. Needs plenty of space and water. Many species of butterfly including Tiger Swallowtails, native bees, honey bees and other insects visit flowers for nectar. Goldfinches eat the seeds. Native Americans used preparations of the root for many ailments.

\$10.00 1 gal.
***Eupatorium album* White Thoroughwort**
 Perennial herb. Full sun to part shade, well drained dry to average soil; drought tolerant. Large tall stems topped with flat clusters of white flowers, 3-5' tall, flowers Sep-Nov. Slender nutlets, are ripe from Nov. - Mar. Eupatorium species are used as a nectar plant by Swallowtail butterflies, visited by many species of bees.

\$10.00 1 gal.
***Helianthus divaricata* Woodland Sunflower**
 Perennial herb. Full sun to part shade, moist to average soil. Erect, tall stem with large opposite leaves topped with yellow ray flowers, 4-6,' blooms late summer. Larval host for Silvery Checkerspot and American Painted Lady butterflies.

\$10.00 1 gal.
***Heliopsis helianthoides* Yellow Oxeye**
 Perennial herb. Full sun to part shade, dry to average soil; drought tolerant. Dry to average soil, 2-5' tall. Yellow sepals surrounding yellow brown disk flowers, blooms June-Sept. Flowers attract a number of butterflies, long-tongued bees, and other insects.

\$10.00 1 gal.
***Hibiscus laevis* Smooth Hibiscus**
 Perennial herb. Full sun to part shade, wet to average soil. Multiple upright stems from a root crown bush out with large serrated leaves, 3-6' tall. Multiple 4-5" pink flowers with maroon eye, blooms Aug.-Oct. Butterflies and hummingbirds seek nectar from the flowers.

\$10.00 1 gal.
***Liatris microcephala* Small Headed Blazing Star**
 Perennial herb, full sun to part shade. Dry to moist, well drained soil. Grass-like basal leaves with several central flowering stalks covered in many small flowers, 1-2'tall, multiple small lavender-purple flowers, blooms June-Aug. Many species of butterfly, including Monarchs, and Leonard's Skipper feed on the flower's nectar.

\$10.00 1 gal.
***Muhlenbergia capillaries* Pink Muhly Grass**
 Perennial grass. Full sun, dry, well drained soil, very drought tolerant. Tall semi-upright spreading grass blades. Clump-forming plants are 2-3' tall by 2-3' wide. Pink flower plumes, turning into seeds at the end of tall grass stalks last through the late fall. Aug-Nov. Seeds. Sept-Nov. Songbirds may eat the seeds.

\$10.00 1 gal.
***Panicum virgatum* Switch Grass**
 Perennial Grass. Full sun to part shade in moist to dry well drained soil. Clumping, upright tall grass; roots send out rhizomes, 3-6' tall. Spreading tuft of small light green flowers atop each stalk during summer. Dark purple seeds mature from Aug. and stay on until Feb. Panic grasses are one of the most important sources of food for ground-feeding songbirds, small mammals and game birds.

\$10.00 1 gal.
***Pycnanthemum incanum* Mountain mint**
 Perennial herb. Morning sun only to part shade, dry to moist, well drained soil. Erect stem with opposite leaves topped with clusters of flowers, 3-6' tall. Tight clusters of white-purple flowers occur 4 weeks in June – Aug. Brown, hairy oblong seeds. Sept.-Nov. Flowers attract bees, wasps, beetles, and butterflies, including the Sleepy Orange. (Midgley, 234)

\$10.00 1 gal.
***Pycnanthemum tenuifolium* Slender Mountain Mint**
 Perennial herb. Part shade, moist well drained, to average dry soil, very drought tolerant. Erect stem with narrow opposite leaves topped with clusters of flowers, 1-3' tall. Tight clusters of white-lavendar flowers, some with purple spots, blooms 4 weeks in June - Aug. Brown, hairy oblong seeds are ripe in Sept.-Nov. Nectar attracts butterflies, Buckeye and Painted Lady, as well as many native bees.

\$10.00 1 gal.
***Rudbeckia fulgida* Blackeyed Susan**
 Perennial herb. Full sun, moist, well drained to dry; drought tolerant. Plant will form a large clump with multi-branched stems, 2-3.5 feet tall. Blooms June-Sept; yellow with dark brown center. Seeds provide songbird forage. Basal leaves often remain through most of the winter months in our area. Larval host plant for Silvery Checkerspot butterfly. Cherokee used the Black eyed Susan medicinally.

Bransford, W.D, Mrs., Ladybird Johnson Wildflower Center.

\$10.00 1 gal.
***Solidago rugosa* Wrinkled Goldenrod**
 Perennial herb. Full sun to part shade, average to dry soil; drought tolerant . Upright main stem with multiple side branches topped with clusters of small flowers 2-5' tall. Multiple small yellow flowers on long showy fronds, blooms for 6-8- weeks during Jun. - Oct. Larval host for: Goldenrod Flower Moth, Tufted Apple-Bud Moth, Confused Eusarca.

\$10.00 1 gal.
***Symphyotrichum georgianum* Georgia Aster**
 Perennial herb. Full sun to part shade, average to dry, well drained soil. Basal leaf rosette with a central upright stem topped with flowers, 2-4' tall. Multiple 2" Bluish-purple ray flowers bloom during Sept. - Nov. Larval host for: Confused Eusarca. General nectar plant for Checkerspots, American Painted Lady, Skippers and Pearl Crescent Butterflies.

Bransford, W.D, Mrs., Ladybird Johnson Wildflower Center.

\$10.00 1 gal.
***Vernonia noveboracensis* Ironweed**
 Perennial herb. Full sun to part shade, average to moist soil. The stout upright stem is 5-8' tall, and topped with many clusters of small, intensely violet flowers; blooms from Aug - Oct. Excellent pollinator support plant, provides nectar and pollen to many species of bees. Tiger Swallowtails and American Painted Lady Butterflies use this plant for nectar.

Shrubs, Shade

\$15.00 1 gal.

***Callicarpa Americana* Beauty Berry**

Small tree, shrub. Sun, part shade, shade, moist to dry. Can be shrubby, multi stemmed in full sun, or slender and tree formed in deeper shade, 3-9' tall. Small clusters of pale pink flowers occur at the axils on the upper branches in early summer. Brilliant mauve berries through fall, fall leaf color is bright lemon yellow. The plant is listed as protected in Maryland (endangered, extirpated). The seeds and berries are important foods for many species of birds particularly the Northern Bobwhite and the foliage is a favorite forage of White tailed Deer. Alabama, Choctaw, Koasati, and Seminole used the American beautyberry medicinally.

\$15.00 1 gal.

***Calycanthus floridus* Sweet Shrub**

Deciduous upright shrub. Full sun to shade, moist, well drained soil. Slender, spreading opposite branches, 3-6' tall. Fragrant, long-lived flowers, maroon to purplish-brown bloom Mar. - Jun. Fleshy cylindrical floral tube, green turning to brown over winter. High quality White-Tailed Deer browse.

\$15.00 1 gal.

***Euonymus americanus* Heart's a Busting**

Erect or trailing deciduous shrub. Partial sun to full shade. Moist to average soil. Woody, multistemmed, leafy shrub, 3-6' tall. Small clusters of 2-3 yellowish-green flowers bloom from Mar.-May. Striking, warty capsule, lime green, turning to bright pink (resembling a strawberry) in the fall from Sept.-Dec. Capsule opens in mid fall, exposing 3-4 brilliant red fruits within. Also known as Heart's a Busting. Leaves consumed by deer. Seeds consumed by some songbirds.

Vick, Alfred F.W., Ladybird Johnson Wildflower Center.

\$15.00 1 gal.

***Lindera benzoin* Spicebush**

Perennial Shrub. Part shade, shade, soil ranges from wet, moist, to dry. Upright oval to broad spreading, loose form with irregular to strongly horizontal branches, 6-12' tall. Fragrant flowers in April, pale yellow leaves in fall, fruits are glossy red berries, fruiting best when receives full sun. Spicebush berries are an important wild life food, songbirds are very fond of spicebush berries. All parts have a distinctive spicy odor when bruised. Larval host for: Spicebush Swallowtail Butterfly (Papilio troilus); Promethea Silkworm.

courtesy Lady Bird Johnson Wildflower center, Littrell II, Ken

\$15.00 1 gal.

***Rhododendron arborescens* Sweet Azalea**

Perennial shrub. Part shade, moist soil, drought sensitive. Multi-stemmed, loosely branched, spreading shrub with dark green leaves, 8-12' tall and wide. Multiple bunches of 3-6 white to pink fragrant flowers with carmine stamens and pistil. Blooms late Summer, fruit, upright cylindrical capsule are ripe Sept - Feb. Hummingbird forage; nectar for Swallowtails, Gulf Fritillaries and migrating Monarchs. Larval host for: Spicebush Swallowtail Butterfly.

Bloodworth, Stefan, Lady Bird Johnson Wildflower center,

\$15.00 1 gal.

***Rhododendron prunifolium* Plumleaf Azalea**

Perennial Shrub. All parts of plant are toxic if ingested by humans or animals. Nectar for Hummingbirds, Swallowtails, Gulf Fritillaries and migrating Monarchs. Larval host for: Spicebush Swallowtail Butterfly.

Wasowski, Sally and Andy, Lady Bird Johnson Wildflower center,

\$15.00 1 gal.

***Rhododendron serrulatum* Hammocksweet azalea**

Perennial Shrub. Part shade, moist, well drained soils; does not tolerate flooded or saturated soil. Multi-stemmed upright deciduous shrub, 10-15' tall. Clusters of small fragrant white flowers in Sept. Nectar for hummingbirds, Swallowtails, Gulf Fritillaries and migrating Monarchs. Larval host for: Spicebush Swallowtail Butterfly.

\$15.00 1 gal.

***Viburnum acerfolium* Maple Leaf Viburnum**

Deciduous shrub. Part sun to light shade, well drained, dry. Low, sparsely branched 3-5' tall. Large white clusters of small flowers, Jun-Aug. Berries that turn from red to blue-black Aug-Nov. Autumn leaf color ranges from brilliant reds to salmon. Bees, butterflies, and insects use the nectar. It is a larval host and/or nectar source for Spring Azure butterfly. The Mapleleaf Viburnum was used by the Cherokee, Chippewa, Iroquois, and Menominee medicinally.

Shrubs, Sun

\$15.00 1 gal.

***Sambucus canadensis* Elderberry**

Deciduous, tall shrub. Sun, part shade, moist, tolerates dry, very hardy plant. Multi-stemmed upright shrub up to 12 feet tall. Large flat clusters of white flowers May-June, purple berries July-Aug. Berries are an important source of food for more than 50 species of birds. (Miller & Miller 382) Deer eat twigs and leaves. The Elderberry was used by the Algonquin, Cherokee, Chickasaw, Chippewa, Choctaw, Creek, Delaware, Dakota, Houma, Iroquois, Menominee, Meskawaki, Micmac, Mohegan, Omaha, Pawnee, Ponca, Rappahannock, Seminole, and also commonly used by both settlers and rural Americans. Elderberries are eaten raw or dried as well as made into pies, wine, sauces, relish and jellies. The branches were used for blowguns and toy popguns or squirt guns.

Trees, Shade

Bloodworth, Stefan, Ladybird Johnson Wildflower Center.

\$25.00 3 gal.

***Amelanchier arborea* Service Berry**

Deciduous shrubby tree. Sun to partial shade, moist, well drained soil; tolerates dry soil. Multiple stems form a rounded, irregular crown with opposite leaves, 6 to 15' tall. White and light pink flowers bloom during April – May. Sweet purplish-black berries are ripe in June. Leaves turns early in fall, ranging from yellow to orange to red. Important nesting and food plant for birds. Host plant for Striped Hairstreak and Coral Hairstreak butterflies. The Serviceberry was used by the Cherokee, Chippewa, Iroquois, Menominee and Ojibwa as well as American settlers as both a medicine and food plant. Blossoming trees were also used as an indicator of when to plant corn.

\$25.00 3 gal.

***Cornus florida* Flowering Dogwood**

Deciduous tree. Partial shade and full sun, loose, moist, well-drained acid soils with low water table. Dense, spreading umbrella-like canopy in full sun, branches horizontally, 15-20' tall. Four large, white petal-like bracts surround a dense cluster of small yellow flowers. Clusters of bright red berries in late summer and autumn, sometimes lasting through winter. Brilliant red autumn color, interesting bark, cannot tolerate searing winds or the hot stressed environments of city conditions. Larval host for: Spring Azure Butterfly, Cecropia Silkmoth.
